

Guaranteed Parts Supply Agreement

Some Gardner engines are now approaching 100 years old, with the majority of engines ranging from between 40 and 60 years old. With this in mind, having a good parts supply is vital for the upkeep of the engines and continued reliability and efficiency – and of course when something unexpected breaks.

The manufacture of new parts is always our biggest annual investment. However, there is a limit to our investment and stock holding, and so we have created tailored solutions to overcome this and provide unparalleled parts supply to our contracted clients. This allows us to keep parts and assemblies specifically for your vessel's engines on our shelves, ready for same day despatch when required.

The key benefits of our guaranteed parts supply:

- All included parts are available for same day despatch worldwide
- Peace of mind knowing that specific parts are available
- Minimum capital outlay for unparalleled access to parts
- No storage required on board, or worry of corrosion to valuable parts
- Constant rotation of parts within our warehouse means no issues caused by long term storage
- Every part is carefully selected and checked to match your engine specification, no guessing or ordering the incorrect part.
- Discounts are available for commercial fleets

There are 3 Levels of Guaranteed Parts Supply:

Standard Parts Supply:

Included at no cost with all GardnerCare® contracts

General service parts ready to send worldwide next day, including:

- All fuel filters**
